LISTING OF THE CLAIMS:

- 1.- 20. (Cancelled)
- 21. (Previously Presented) Radioimmunoconjugate comprising an alphaemitting radionuclide bound to a monoclonal antibody, wherein said monoclonal antibody is C595.
- 22. (Previously Presented) Radioimmunoconjugate according to claim 21, wherein said alpha-emitting radionuclide is selected from the group comprising: Tb-149, At-211, Bi-212, Bi-213 and Ac-225.
- 23. (Previously Presented) Radioimmunoconjugate according to claim 22, wherein said alpha-emitting radionuclide is Bi-213 or Tb-149.
- 24. (Previously Presented) Radioimmunoconjugate according to claim 22, wherein said alpha-emitting radionuclide is Ac-225.
- 25. (Previously Presented) Radioimmunoconjugate according to claim 21, wherein said alpha-emitting radionuclide is bound to said monoclonal antibody by a chelating agent.
- 26. (Previously Presented) Radioimmunoconjugate according to claim 25, wherein said chelating agent is DOTA, cDTPA, DTPA-CHX-A or TETA.
- 27. (Previously Presented) Radioimmunoconjugate according to claim 21, for use in therapy of breast, prostate, ovarian and/or pancreatic cancer.
- 28. (Withdrawn) Use of a radioimmunoconjugate according to claim 21 in the manufacture of a radiopharmaceutical for therapy of breast, prostate, ovarian or pancreatic cancer.

- 29. (Withdrawn) Method for manufacturing a radioimmunoconjugate, wherein an alpha-emitting radioisotope is bound to a monoclonal antibody, said monoclonal antibody being C595.
- 30. (Previously Presented) Radiopharmaceutical for cancer therapy comprising a radioimmunoconjugate of an alpha-emitting radionuclide bound to a monoclonal antibody, wherein said monoclonal antibody is C595.
- 31. (Previously Presented) Radiopharmaceutical according to claim 30, wherein said alpha-emitting radionuclide is selected from the group comprising: Tb-149, At-211, Bi-212, Bi-213 and Ac-225.
- 32. (Previously Presented) Radiopharmaceutical according to claim 30, comprising a pharmaceutically acceptable carrier and/or diluent and/or excipient.
- 33. (Previously Presented) Radiopharmaceutical according to claim 30, wherein said cancer is breast, prostate, ovarian or pancreatic cancer.
- 34. (Withdrawn) Method of treatment of a mammal affected by a cancer which comprises administering to said mammal a therapeutically effective amount of a radiopharmaceutical comprising a radioconjugate of an alpha-emitter bound to a monoclonal antibody, said monoclonal antibody being C595.
- 35. (Withdrawn) Method according to claim 34, wherein said alpha-emitting radionuclide is selected from the group comprising: Tb-149, At-211, Bi-212, Bi-213 and Ac-225.
- 36. (Withdrawn) Method according to claim 34, wherein said cancer is one of breast, prostate, ovarian and pancreatic cancer.

- 37. (Withdrawn) Method according to claim 36, wherein said alpha-emitting radionuclide is selected from the group comprising: Tb-149, At-211, Bi-212, Bi-213 and Ac-225.
- 38. (Withdrawn) Method according to claim 36, wherein said alpha-emitting radionuclide is Bi-213 or Tb-149.
- 39. (Withdrawn) Method according to claim 34, wherein said radiopharmaceutical is administered as an adjunctive therapeutic treatment.
- 40. (Withdrawn) Method according to claim 34, wherein said radiopharmaceutical is administered directly after removal of a primary tumour.
- 41. (Withdrawn) Method according to claim 34, wherein said radiopharmaceutical is administered upon detection of regions of tumour cells at the preangiogenic stage.
- 42. (Withdrawn) Method according to claim 34, wherein said radiopharmaceutical is administered upon diagnosis of high risk factors in said mammal.
- 43. (Withdrawn) Method according to claim 34, wherein said radiopharmaceutical is administered upon detection of certain cancer proteins in serum.
